

Bikal Shrestha

Shrewsbury, Massachusetts | (617) 501-3487 | bikal3.bs@gmail.com | [LinkedIn](#) | [Github](#)

Technical Skills

- Remote Sensing Software: Google Earth Engine, TerrSet Geospatial Monitoring and Modeling
 - GIS Software: ESRI ArcGIS Pro, ArcGIS Online, and QGIS.
 - Programming Languages: Python, R, SQL, HTML, JavaScript, Nodejs, Flutter
-

Education

Master of Science, Geographic Information Science for Remote Sensing
Clark University, Worcester, Massachusetts

Expected May 2026

Master of Science in Data Analytics
Clark University, Worcester Massachusetts

December 2023

Bachelor of Science in Computing
Softwarica College of IT and E-commerce, Kathmandu, Nepal

January 2020

Projects

Advance Remote Sensing– Clark University

- Spatio-Temporal Analysis of Wildfire Patterns and Vulnerability Assessment in Natural Protected Areas Indigenous Territories of Peru.

Advanced Geospatial Analysis with Python – Clark University

- Spatiotemporal Analysis of Wildfire Spread in California Using Geospatial Python.

Advanced Raster GIS – Clark University

- Evaluating Machine Learning Approach for Spatial-temporal Detection and Prediction of Urban Heat Islands.

Introduction to Remote Sensing – Clark University

- A study on landscape dynamics in North Carolina Post-Hurricane Helene, 2024.
- Generated maps of Water Extent Post Hurricane Impact and Pre and Post Hurricane NDVI analysis.

Introduction To GIS – Clark University

- Parcel Level Analysis of Urban Heat Islands (UHI) in Worcester, Massachusetts.
-

Relevant Work Experience

Business Analyst –Maritz Consulting Group DBA Ledelsea

January 2022 – May 2022

- Designed, tested and debugged application with assistance from senior management.
- Assisted with gathering requirements across business partners and developing test plans and executions.
- Proved support to projects related to technology and business requirements.

Data Analyst/ Developer – Softwarica College of IT and E-commerce

July 2020 – July 2021

- Cleaned millions of data from 250 different table source of Moodle database using SQL and Tableau Prep.
- Developed executive marketing, ticketing, and performance dashboard using Tableau.
- Designed and developed Android Application and Backend API's using Flutter and Nodejs for schoolworkspro.

Teacher Assistant – Softwarica College of IT and E-commerce

June 2019 - July 2020

- Supervised about 40 undergraduate students at assigned project per semester.
 - Performed research work and executed valuable innovative projects like building three-wheel electric car, online transaction vending machine.
-

Certification

- Suitability Modeling – Creating a Simple Suitability Model
- Terrian Analysis Using ArcGIS pro
- Nasa Open Science 101 Certification
- Google Data Analytics Certification from Coursera

April 2025

March 2025

August 2024

June 2021

Relevant Coursework

Geospatial Analysis with R, Advanced Vector GIS, Web-Based GIS Mapping, GIS Programming, Cartography, Principles of Data Structures, Applied Databases
